

Smith & Williamson Investment Management LLP

Qualitative Report for Structured Finance Instruments

This report was produced by Smith & Williamson Investment Management LLP (“SWIM”, “we” or “our”) and provides a qualitative order execution assessment for Structured Finance Instruments (“Structured Products”), in the format described in Article 3(3) of Commission Delegated Regulation EU/2017/576, for the period 1 January 2018 to 31 December 2018.

Execution venues

In 2018, SWIM transmitted all client orders in Structured Products to Smith & Williamson Investment Services Limited (“SWIS”), a Smith & Williamson Group company, for execution or further transmission.

SWIM has policies and procedures in place to monitor any payments, or minor non-monetary benefits, received from third parties to ensure that they are designed to enhance the quality of service to the client and do not impair our ability to act in accordance with the best interests of our clients. In 2018, SWIM has not recorded any conflicts of interest with any venues used in this asset class.

Execution factors

To achieve the best possible result, we have, on a consistent basis, taken into account a number of execution factors, including: price, costs associated with execution, speed of execution, likelihood of execution, the size and nature of the order, and quality of any related clearing and settlement facilities.

We have determined the relative importance of each of these factors and the manner in which each order was executed, based on the circumstances at the time of execution, such as:

- The type of financial instrument and nature of the order;
- The execution venues to which the order could have been directed.

When trading Structured Products, due to their bespoke nature, we assessed the fairness of the price offered on a case by case basis, assessing market data available to us, to ensure that our pricing decisions were always in our clients’ best interests.

Client categorisation

SWIM transmitted orders on behalf of both Retail and Professional clients, however there was no differentiation in client treatment with regards to order execution arrangements.

Summary of analysis and conclusions

The Best Execution Working Group (“BEWG”) monitored adherence to the firm’s Order Execution Policy and the effectiveness of our order execution arrangements and procedures. Structured products are generally products of a bespoke nature, designed by the Product Provider. Due to the lack of reliable public data on the price of these products, it was difficult to monitor the execution quality of these orders. We are nevertheless confident that we have achieved the best possible result for our clients on a consistent basis, having assessed the fairness of the price offered for each order at the time of execution.

Further information regarding the monitoring carried out on execution quality can be found in the SWIS and NCL qualitative reports for Structured Finance Instruments.
